

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

The active energy beam-curable composition for an optical material is provided that comprises (A) a di(meth)acrylate represented by the following general formula (1) and (B) a mono(meth)acrylate represented by the following general formula (2). A method for producing an optical material includes a step of applying or pouring the composition to a casting mold having a predetermined shape, and a step of irradiating an active energy beam to the composition.

In formula (1), R₁ and R₂ independently represent a hydrogen atom or a methyl group, R₃ and R₅ independently represent a hydrogen atom, a methyl group or an ethyl group, and R₄ to R₆ independently represent a hydrogen atom, a methyl group or a bromine atom.

In formula (2), R₉ and R₁₀ independently represent a hydrogen atom or a methyl group, R₁₁ represents a hydrogen atom, a phenyl group or a cumyl group, and n represents 0 or an integer of 1-5.
